

Flexxoturi – Flexxopomp – Flexxopomp-C

Function: Semi- and full automatic filling of a Flexxomat disinfection mat with diluted disinfectant.

Flexxoturi

The Flexxoturi is a water-driven venturi pump that draws disinfectant concentrate from the Flexxocontainer with the water in the correct proportion (set %) and thus pumps diluted disinfectant to the mat. This pump is regulated by a water time switch.

Flexxopomp

The Flexxopomp is an electric pump that, by means of peristaltic movements of the tube, pumps diluted disinfectant from the Flexxocontainer to the mat. This pump is regulated by a time switch.

Flexxopomp-C

The Flexxopomp-C is specially designed for the Flexxomat TT-C and guarantees sensor-controlled filling. Sensors in the mat detect when disinfectant needs to be supplied by the Flexxopomp-C.

Technical specifications pumps

Version	Flexxoturi	Flexxopomp	Flexxopomp-C
Requires	Water connection	Power connection	Power connection
Flow	4L/min	30-60-90-120 L/hour	30-60-90-120 L/hour
Operates with	Water timer	Time switch	filling sensors
Hose coupling	8 mm	8 mm	8 mm
Including	5 m hose 8*12 mm	5 m hose 8*12 mm	5 m hose 8*12 mm
