

Working and stocking conditions for clips

Working conditions

- For use only in greenhouse protected growing conditions
- Chemicals; not allowed. Such as pesticides, herbicides, sulfur etc.
- Allow the bio clips to acclimate and then use immediately, do not store for months
- Sprinkling above or fogging in the greenhouse is bad for the quality of clips
- When using biodegradable clips. Let the clips acclimate first and use immediately. The clips cannot be stored for months.

Stocking conditions

- Stock the boxes in a dry and chill place, preferably between 15-25 degrees.
- Avoid direct exposure to sunlight or heat sources.
- Stock 24 hours in greenhouse conditions before use.
- Do not use the clips with chemicals such as pesticides, herbicides or sulfur. This may affect the quality of the clips.
- Properties of biodegradable clips could change by incorrect use or storage conditions.
